TERRAIN® Play
ENGINEERED FOR SAFETY. DESIGNED FOR PLAY.

GLADIUS
SPORTS EQUIPMENTS

A Division of TerrainPlay

INTRODUCTION

WELCOME TO GLADIUS

Gladius Sports Equipment, a division of TerrainPlay, delivers high-performance, durable and reliable sports equipment designed to complement professional-grade court installations.
We go beyond supplying gear: our value lies in offering turnkey solutions that integrate design, flooring and equipment into one seamless project. From basketball and volleyball to tennis, handball, badminton and football, our expert team ensures every setup meets international standards of safety, performance and aesthetics.
With the flexibility to source a wide range of equipment to suit each client, Gladius is your trusted partner in creating complete, ready-to-play sports environments for schools, clubs and sports complexes alike.

6 Sports · 15 Systems

Basketball, volleyball, handball, tennis, badminton & football equipment, engineered as one family.

UAE-Wide Delivery

Installed and supported across every Emirate, from Dubai to Fujairah.

Full-Service Fit-Out

Equipment, court flooring, design and installation under one roof.

IN-GROUND BASKETBALL STAND

IRONHOOP

"Built to Stay. Built to Perform."

3.05m
Regulation Rim Height

Tempered Glass
Backboard Material

In-Ground
Anchored Installation

OVERVIEW

Professional fixed in-ground basketball system designed for outdoor courts and sports complexes. Built with a heavy-duty steel structure, FIBA-size tempered glass backboard, competition flex rim, and protective padding for durability, safety, and high-performance gameplay.

POLE & BASE PAD

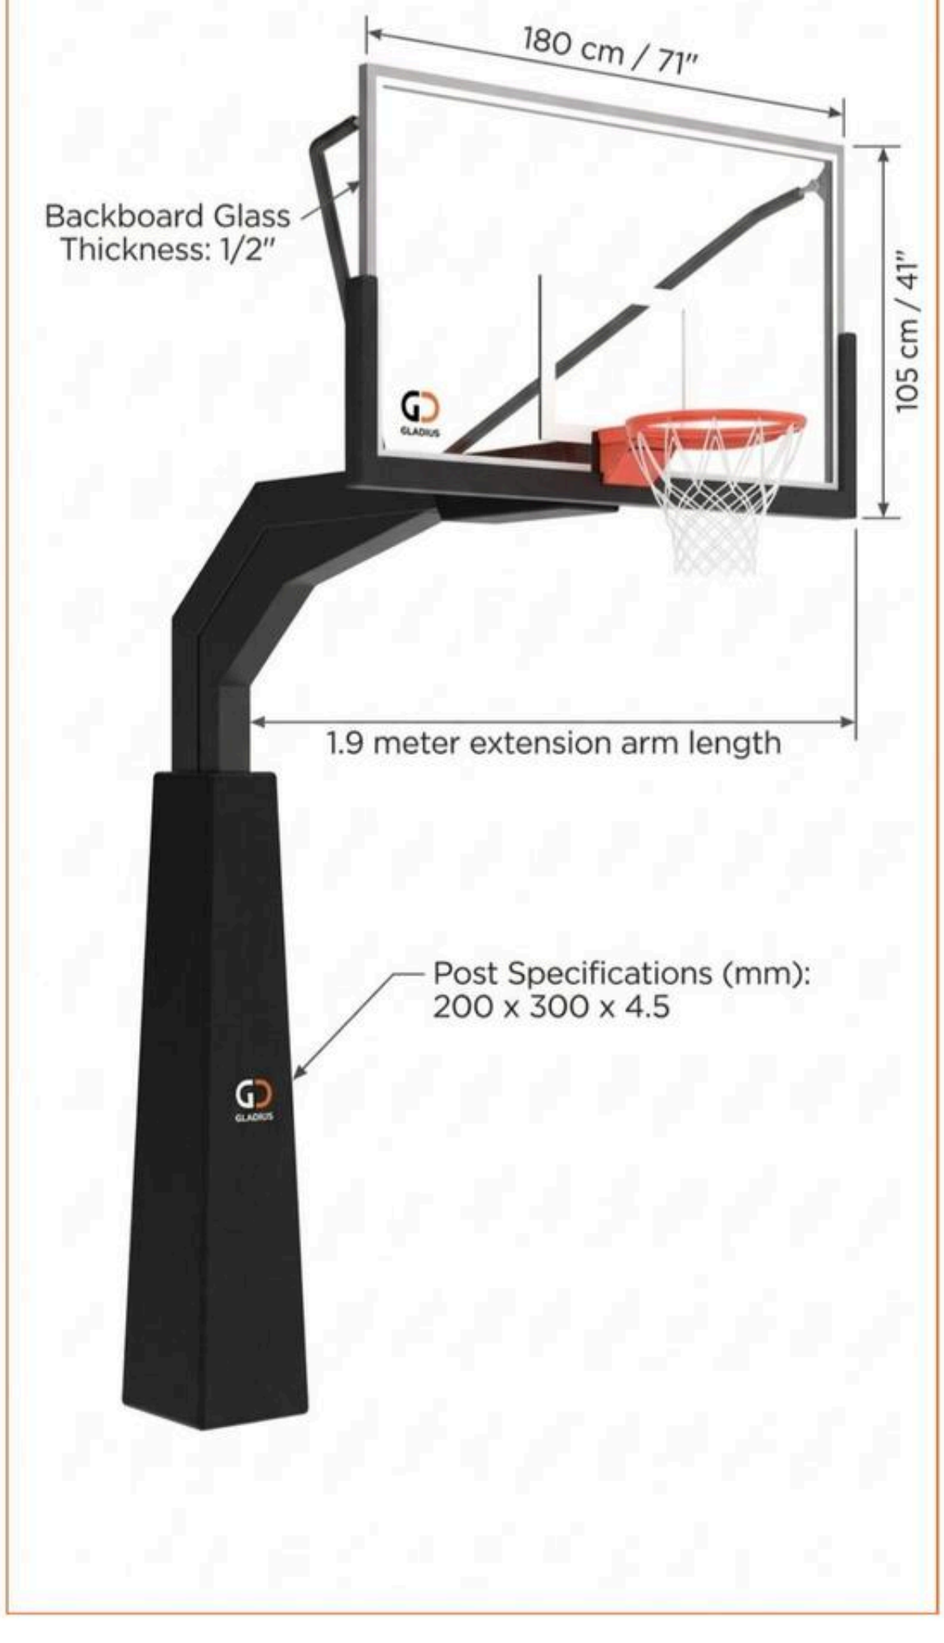

- High-density protective padding for enhanced player safety
- Designed for both indoor and outdoor applications
- Helps reduce impact against the basketball structure
- Durable outer covering suitable for frequent use

BACKBOARD & EDGE PADDING

- Provides consistent ball rebound and excellent visibility
- Designed for competitive and recreational basketball use
- Suitable for indoor and outdoor courts
- Protective padding around the backboard edges
- Helps minimise injury risk from accidental player contact
- Durable construction for long-term court use

TECHNICAL DETAILS

IN-GROUND BASKETBALL STAND

FLEXHOOP

"Built to Last. Set for Every Player."

3.05m
Regulation Rim Height

Tempered Glass
Backboard Material

In-Ground
Anchored Installation

OVERVIEW

Flexhoop is a heavy-duty in-ground basketball system designed for versatile use across different age groups. Featuring a robust 180 × 180 mm steel post, tempered-glass backboard, height adjustment and protective padding, it delivers stability, durability and safe play for schools, communities, parks and residential courts.

CONSTRUCTION & HEIGHT ADJUSTMENT

- 180 × 180 mm steel post for excellent stability
- Powder-coated finish for rust and UV protection
- Stainless-steel fasteners for durability
- In-ground installation for a secure, rigid structure
- Adjustable rim height to suit different age groups
- Allows younger players to develop skills at a comfortable height
- Full-height setting suitable for standard basketball play

BACKBOARD & EDGE PADDING

- Tempered-glass backboard for consistent rebound performance
- Professional-style backboard design
- Heavy-duty breakaway rim for intensive play
- Reinforced support structure helps minimise vibration
- Protective pole and backboard padding included
- Helps reduce impact during accidental player contact

TECHNICAL DETAILS

PORTABLE BASKETBALL STAND

SOLITE

"Roll In. Play On."

2.05–3.05m
Adjustable Height Range

Roll-In
No Anchoring Needed

1.5m × 1m
Steel Base Footprint

OVERVIEW

Portable basketball system designed for recreational and semi-professional play. Features a heavy-duty steel base, adjustable rim height, tempered glass backboard, and smooth mobility for versatile indoor and outdoor use.

POLE & BASE PAD

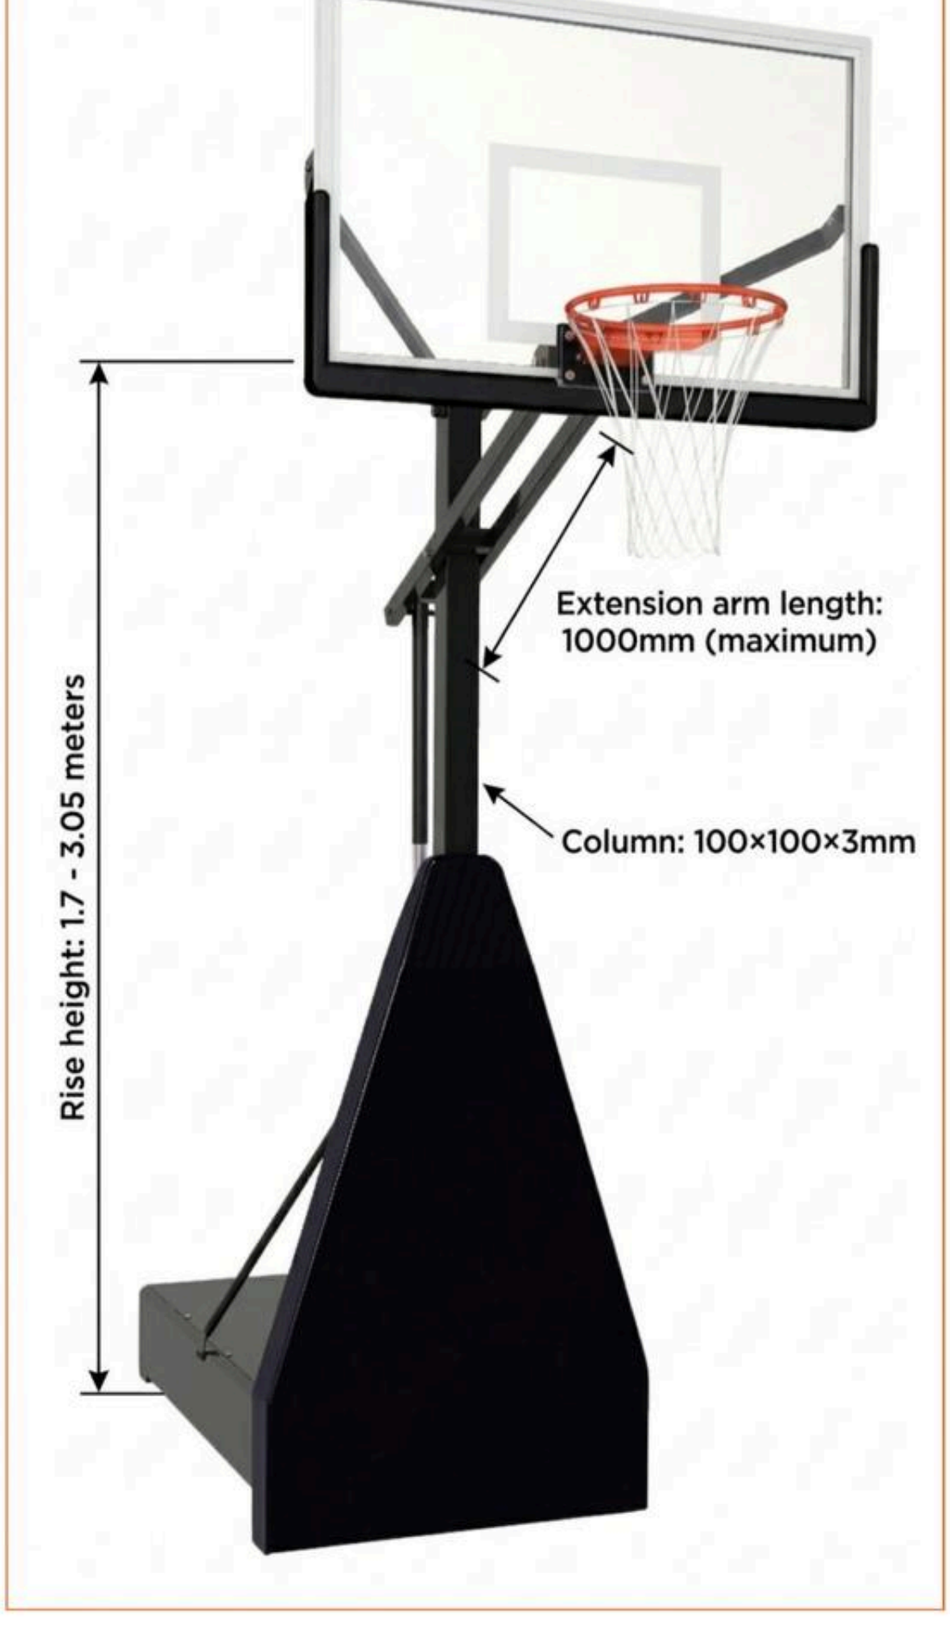

- High-density protective padding for enhanced player safety
- Helps absorb impact during accidental player contact
- Durable covering designed for regular indoor and outdoor use
- Provides additional protection around the lower structure and support assembly

BACKBOARD & EDGE PADDING

- Tempered glass backboard for professional-quality play
- Provides excellent ball rebound and consistent playing performance
- Clear glass construction offers strong visibility and a professional appearance
- Protective padding fitted around the backboard frame
- Neat, integrated design complements the overall basketball system

TECHNICAL DETAILS

ADJUSTABLE & PORTABLE BASKETBALL STAND

ORIENTA

"Adjust Your Game. Take It Anywhere."

3.6–3.8m
Total System Height

Roll-In
Fillable Base & Wheels

Steel
Heavy-Duty Frame

OVERVIEW

Compact portable basketball system designed for schools, homes, training facilities, and community courts. Features an adjustable rim height, durable steel structure, fillable base for stability, and integrated wheels for easy movement.

FRAME & STRUCTURE

- Heavy-duty steel construction for stability and durability
- Designed for regular training and recreational basketball use
- Robust support structure for reliable performance during play
- Durable finish suitable for long-term use

BACKBOARD, RIM & NET

- Durable backboard designed for consistent ball rebound
- High-visibility playing surface with clear target markings
- Strong supporting frame provides stability during play
- Heavy-duty basketball rim designed for regular use
- Securely mounted to the backboard assembly
- Includes durable basketball net for reliable everyday performance

TECHNICAL DETAILS

Base Size: 1100 mm x 700 mm x 200 mm

WALL-MOUNTED BASKETBALL HOOP

SKYMOUNT

"Pro Play. Zero Footprint."

Wall-Mounted
Space-Saving Installation

Crank Adjust
Manual Height Control

Tempered Glass
Backboard Material

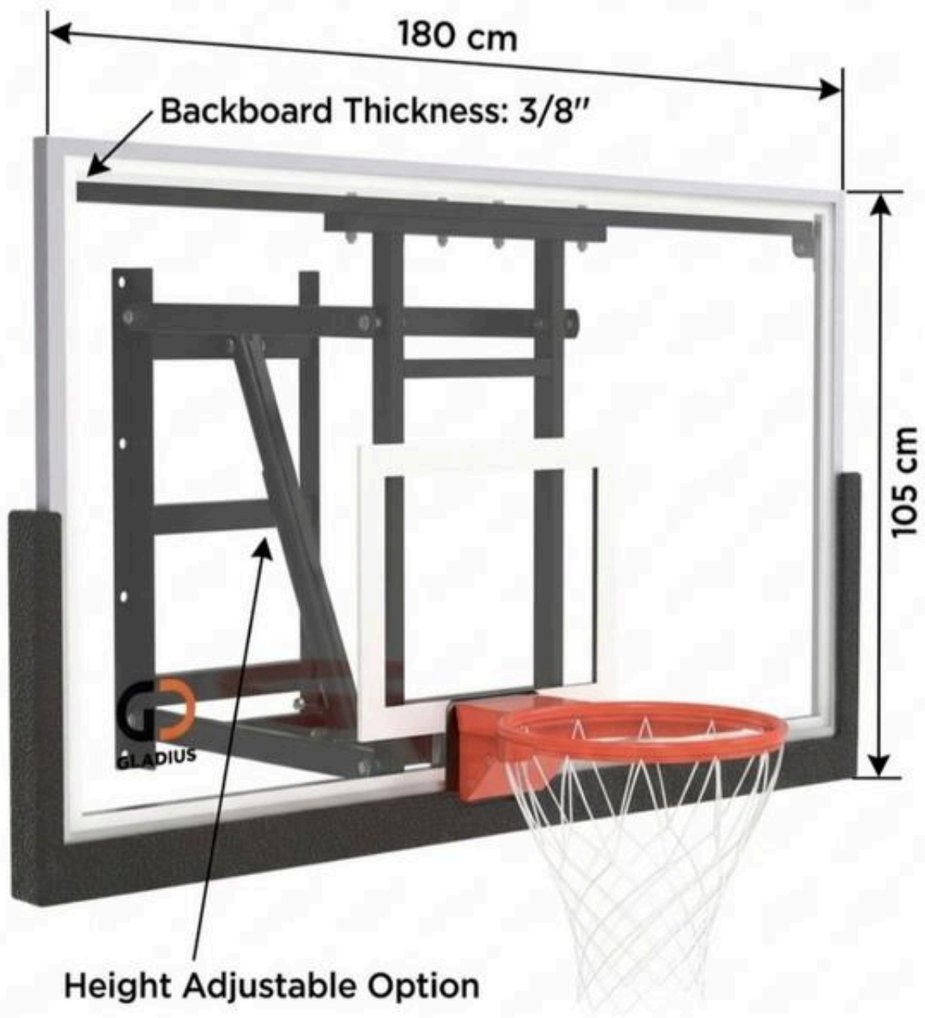

OVERVIEW

Professional wall-mounted basketball system designed for gyms, school halls, and space-saving indoor courts. Features a manually adjustable height system, tempered glass backboard, and durable steel construction for reliable performance and safety.

TECHNICAL DETAILS

BACKBOARD & EDGE PADDING

- Provides excellent visibility and consistent ball rebound performance
- Strong, durable construction designed for intensive use
- Direct-mounted goal design helps minimise stress on the backboard
- Helps reduce the risk of injury from accidental player contact
- Protective bolt-on padding fitted around the backboard edges
- Durable construction designed for long-term use

WALL MOUNT

- Heavy-duty wall-mounted structure designed for secure and stable installation
- Adjustable arm system securely fixed to the supporting structure
- Manual crank mechanism for easy height adjustment
- Suitable for indoor and outdoor basketball courts
- Ideal for schools, gyms, sports facilities and recreational areas

PREMIUM WALL-MOUNTED FOLDABLE BASKETBALL SYSTEM

TITANFOLD PRO

"Premium Design. Powerful Play."

Side-Fold
Folds Flat to the Wall

Crank Adjust
Manual Height Control

Tempered Glass
1800 × 1050 mm Backboard

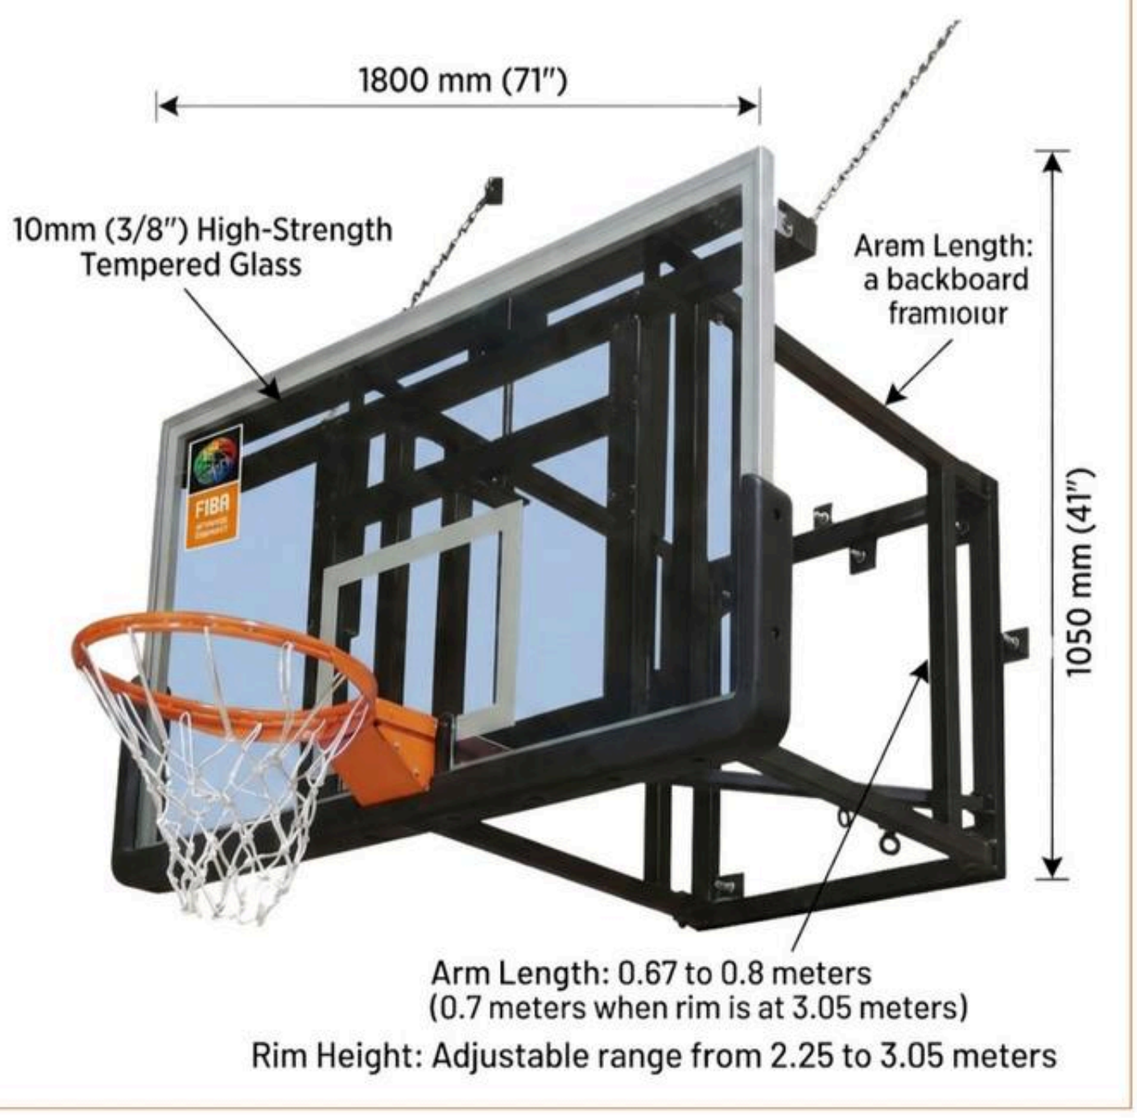

OVERVIEW

The TitanFold Pro is a professional wall-mounted basketball system with a compact side-fold design for maximum space efficiency. Built with a heavy-duty steel structure, it features a FIBA-size 1800 × 1050 mm tempered glass backboard and competition flex rim for elite-level performance.

TECHNICAL DETAILS

BACKBOARD, RIM & PADDING

- 1800 × 1050 mm tempered glass backboard for competition-level rebound
- Competition flex rim absorbs impact during intensive play
- Rigid steel frame helps minimise backboard vibration
- Bolt-on edge padding helps reduce injury risk from accidental player contact
- Clear glass gives a premium, professional appearance
- Built for long-term use in high-traffic venues

SIDE-FOLD WALL MOUNT

- Side-fold design swings the goal flat against the wall when not in use
- Heavy-duty steel frame securely anchored to the supporting wall
- Manual crank mechanism for easy height adjustment
- Frees up the full court for multi-sport use
- Ideal for school halls, gyms and multi-purpose sports facilities

PORTABLE VOLLEYBALL POST SYSTEM

PALMNET

"Flexible Setup. Powerful Play."

1.98–2.43m
Net Height Range

Roll-In
No Floor Sleeves Needed

Steel
89 mm Reinforced Upright

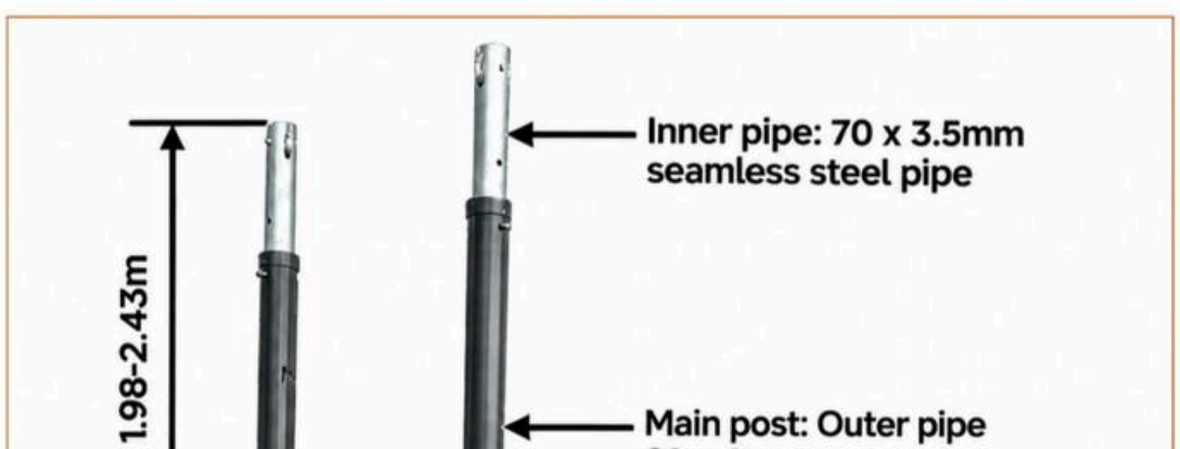

OVERVIEW

A heavy-duty box-type portable volleyball post system designed for facilities where permanent floor sockets are impractical or unavailable. Its spring-assisted height adjustment, integrated counterweight system and mobile design make it suitable for competition, training and recreational applications.

TECHNICAL DETAILS

HEAVY-DUTY STEEL CONSTRUCTION

- Reinforced 89 mm steel upright for strength and durability
- Each post weighs approximately 85 kg (187 lbs)
- Robust box-type construction provides excellent stability

ADJUSTABLE HEIGHT SYSTEM

- Spring-assisted height adjustment for smooth and effortless positioning
- Pin-stop mechanism provides secure height selection
- Adjustable from 1.98 m to 2.43 m

NET TENSIONING

- Integrated ratchet-type rope tightener for quick and easy operation
- Allows controlled net tensioning for a taut and stable playing net
- Designed for reliable performance during training and competitive play

PORTABLE & STABLE BASE

- Independent box-type base eliminates the need for permanent floor sleeves
- Base can accommodate up to 200 kg of sand counterweight per post
- Two integrated rear wheels allow easier transportation and positioning
- Ideal for venues requiring a temporary or movable volleyball setup

IN-GROUND VOLLEYBALL POST SYSTEM

PALMNET IN-GROUND

"Anchored for Action."

2.23–2.44m
Net Height Range

In-Ground
100 × 6 mm Embedded Sleeve

Aluminium
86 × 5 mm Posts

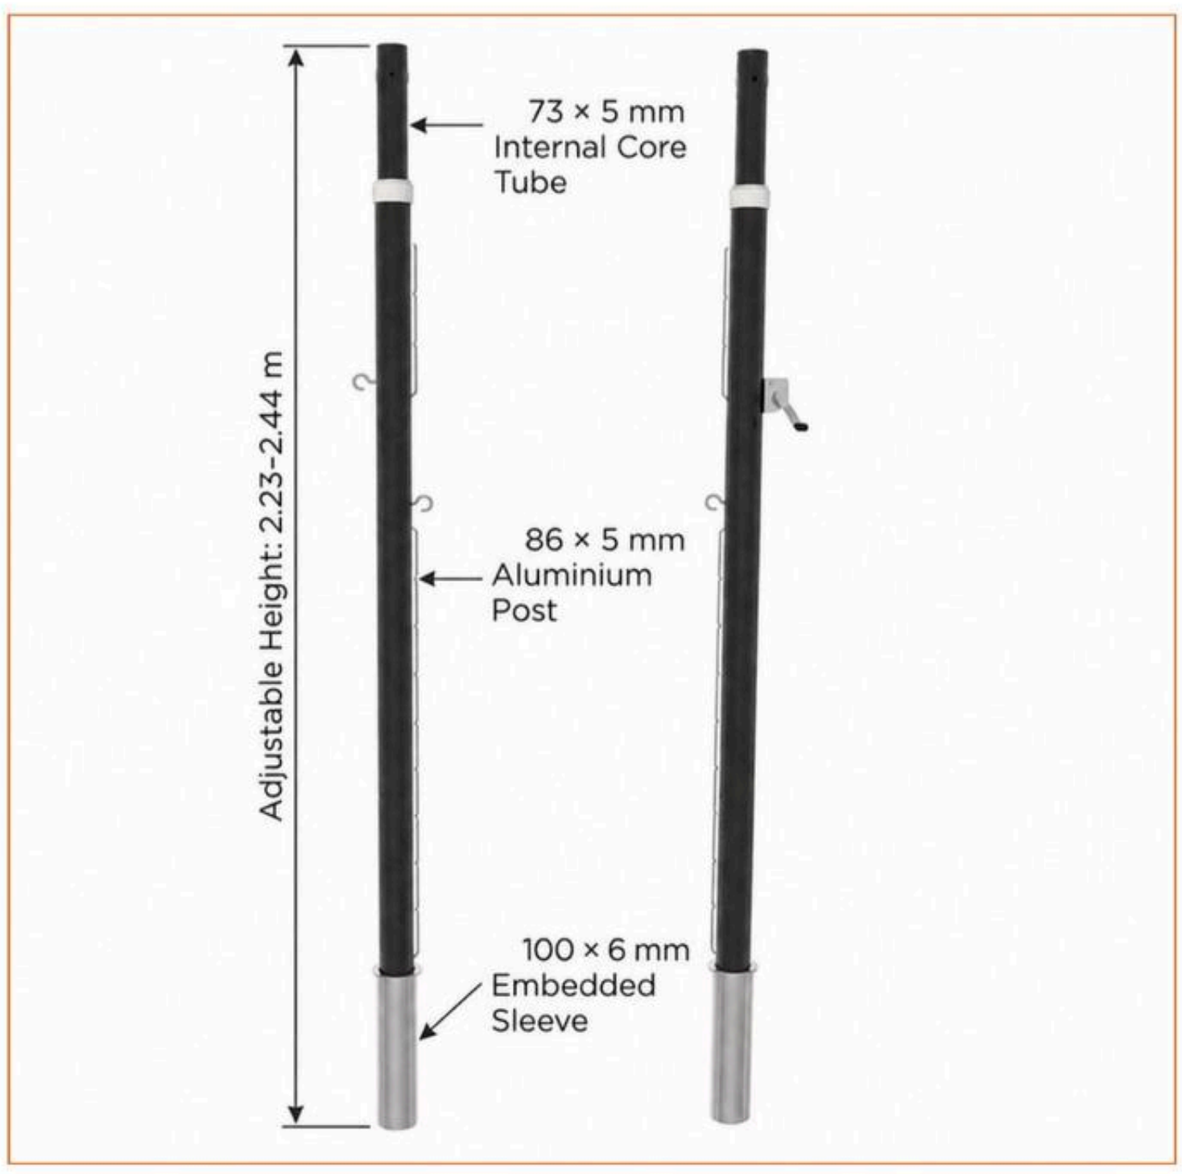

OVERVIEW

A competition-level aluminium volleyball post system designed for professional, training and institutional courts. Its heavy-duty aluminium construction, adjustable height and durable net system provide reliable stability and long-term performance for indoor and outdoor volleyball applications.

TECHNICAL DETAILS

ALUMINIUM CONSTRUCTION

- Heavy-duty 86 × 5 mm aluminium posts
- 73 × 5 mm internal core tube
- 100 × 6 mm embedded sleeve for secure installation
- High-strength construction for excellent stability
- Corrosion-resistant aluminium for long service life

HEIGHT ADJUSTMENT

- Adjustable from 2.23–2.44 m
- Stainless-steel tightening mechanism
- Easy height adjustment for different playing requirements

VOLLEYBALL NET

- 1 × 9.5 m competition volleyball net
- Knotless polyester construction
- 4 mm netting with 10 cm mesh
- Weather and light-resistant material
- Reinforced top edge with thick canvas tape

NET TENSIONING

- 4.2 mm steel wire rope
- 12 m rope length
- Durable tensioning system maintains a firm, consistent net
- Heavy-duty net construction for frequent use

SAFETY & PROTECTION

- Protective post padding available
- Helps reduce impact during accidental player contact
- Suitable for high-use sports facilities

BEACH VOLLEYBALL POST SYSTEM

PALMNET BEACH

"Built for Beachside Action."

1.98–2.43m
Net Height Range

In-Ground
400 mm Burial Depth

Aluminium
Corrosion-Resistant Posts

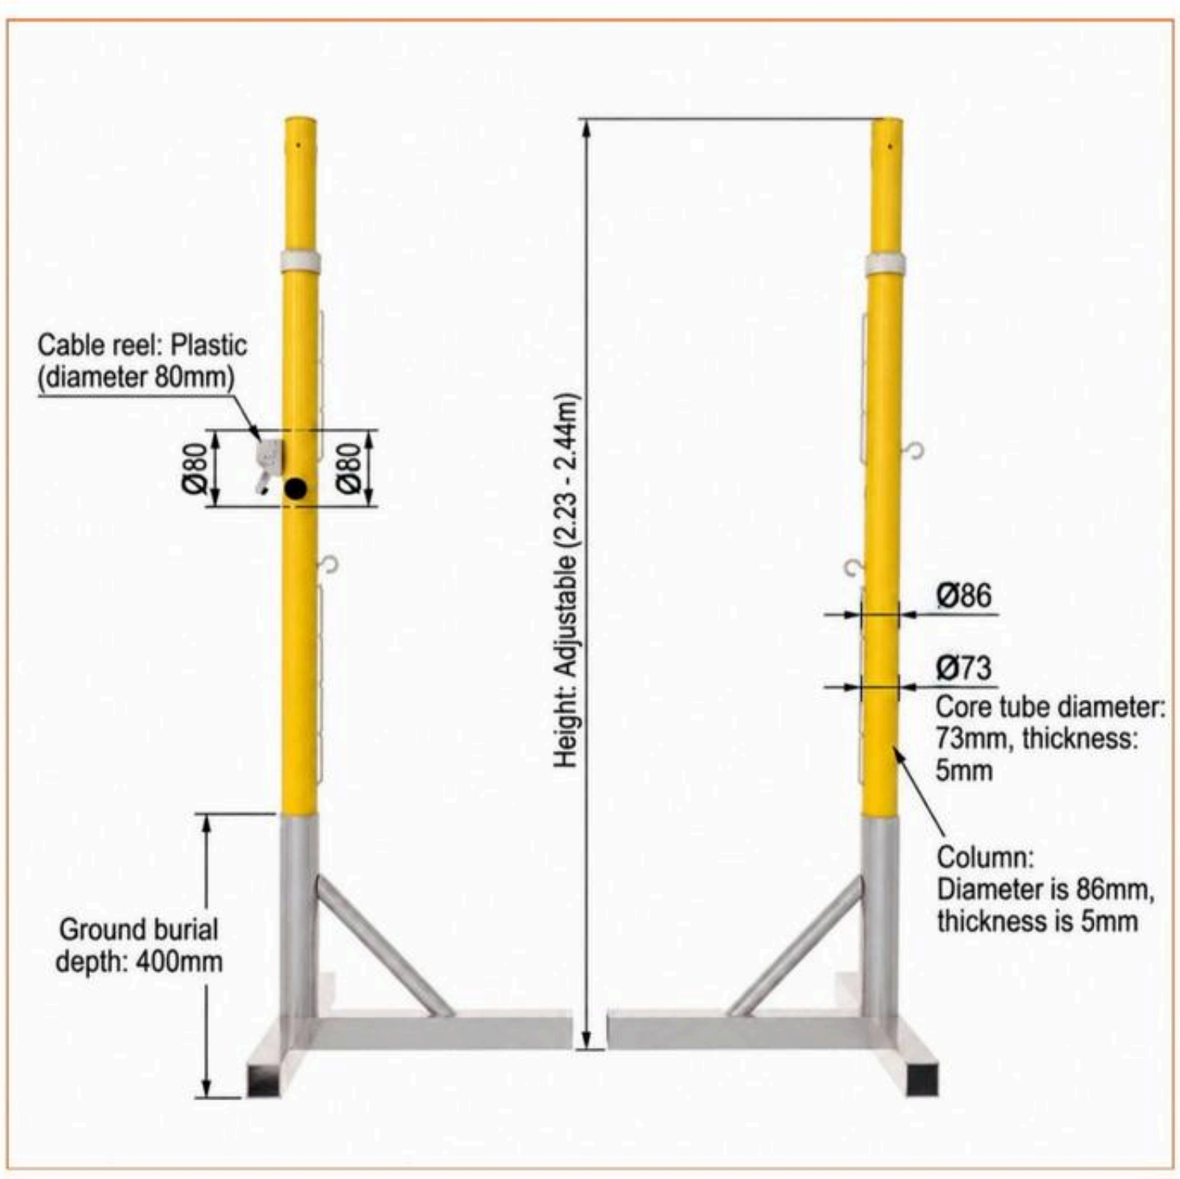

OVERVIEW

A competition-level aluminium beach volleyball post system designed for durable performance in demanding outdoor environments. With adjustable height, reinforced construction, stainless-steel tensioning hardware and a weather-resistant volleyball net, it provides reliable stability and easy setup for professional and recreational beach volleyball courts.

TECHNICAL DETAILS

ALUMINIUM CONSTRUCTION

- Heavy-duty 86 mm aluminium posts
- 5 mm wall thickness for enhanced rigidity
- 73 × 5 mm internal core tube
- Corrosion-resistant aluminium construction
- Designed for long-term outdoor use

HEIGHT ADJUSTMENT

- Spring-assisted height adjustment for smooth and effortless positioning
- Pin-stop mechanism provides secure height selection
- Adjustable from 1.98 m to 2.43 m

GROUND FIXING

- 400 mm recommended burial depth
- Heavy-duty pre-buried base components
- 80 × 80 × 5 mm square base tube
- 100 × 6 mm round base tube
- Reinforced foundation provides excellent stability

BEACH VOLLEYBALL NET

- 1 × 8.5 m competition-style net
- 3 mm knotted polyethylene mesh & 10 cm mesh size
- UV and weather-resistant construction
- Non-sand-adhering mesh helps maintain a cleaner net

NET REINFORCEMENT

- 11.5 m × 4.2 mm steel wire rope
- Thicker net lines provide enhanced durability
- Reinforced 5 cm edge bands on all four sides
- White top band and black side/bottom bands for clear visibility

SAFETY & PROTECTION

- Optional protective post padding
- Helps reduce impact during accidental player contact
- Suitable for high-use sports environments

PROFESSIONAL FIXED HANDBALL GOAL SYSTEM

ARENAGOAL

"Engineered for the Winning Shot."

3 × 2 m
Regulation Goal Size

Anchored
Ground-Fixed Installation

Aluminium
80 × 80 mm Frame

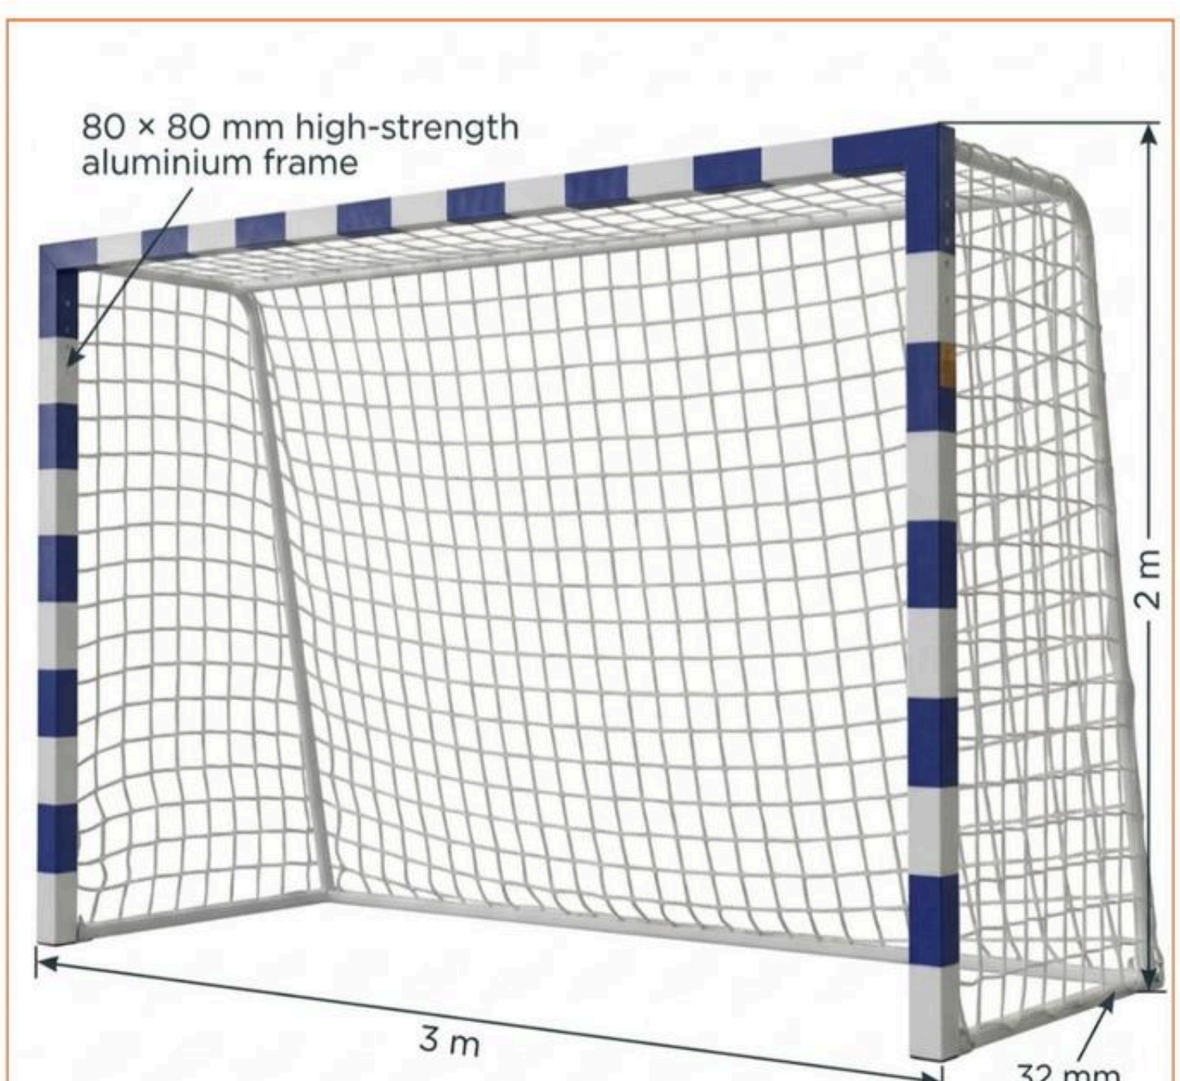

OVERVIEW

A heavy-duty 3 × 2 m regulation handball goal engineered for training and competition environments. Arenagoal combines a high-strength 80 mm square aluminium frame with reinforced steel corner construction, a reinforced rear structure and a knotless HDPP net for stability and durability.

TECHNICAL DETAILS

HIGH-STRENGTH ALUMINIUM FRAME

- 80 × 80 mm high-strength aluminium frame
- Heavy-duty construction for training and competition use
- Reinforced steel corner plates for added rigidity
- 32 mm galvanized rear pipe for structural reinforcement
- Regulation 3 × 2 m goal dimensions

STABILITY & FIXING

- Reinforced corner structure enhances overall stability
- Ground anchoring system for secure installation
- Stainless-steel hardware for durability and corrosion resistance
- Self-supporting frame for a rigid, stable goal

NET SYSTEM

- 5 mm HDPP knotless net
- 100 × 100 mm mesh configuration
- Secure ground-hook fixing system
- Knotless construction provides a clean, durable finish

FINISH & CUSTOMISATION

- Powder-coated finish for corrosion protection
- Suitable for indoor and outdoor applications
- Available in red/white or blue/white colour combinations
- Fade-resistant colour finish for long-term appearance

PORTABLE TENNIS POST SYSTEM

IMPERIAL

"Ready to Move. Built to Perform."

80 × 80 mm
Aluminium Post Section

Portable
Braked Nylon Wheels

200 kg
Total Weight incl. Ballast

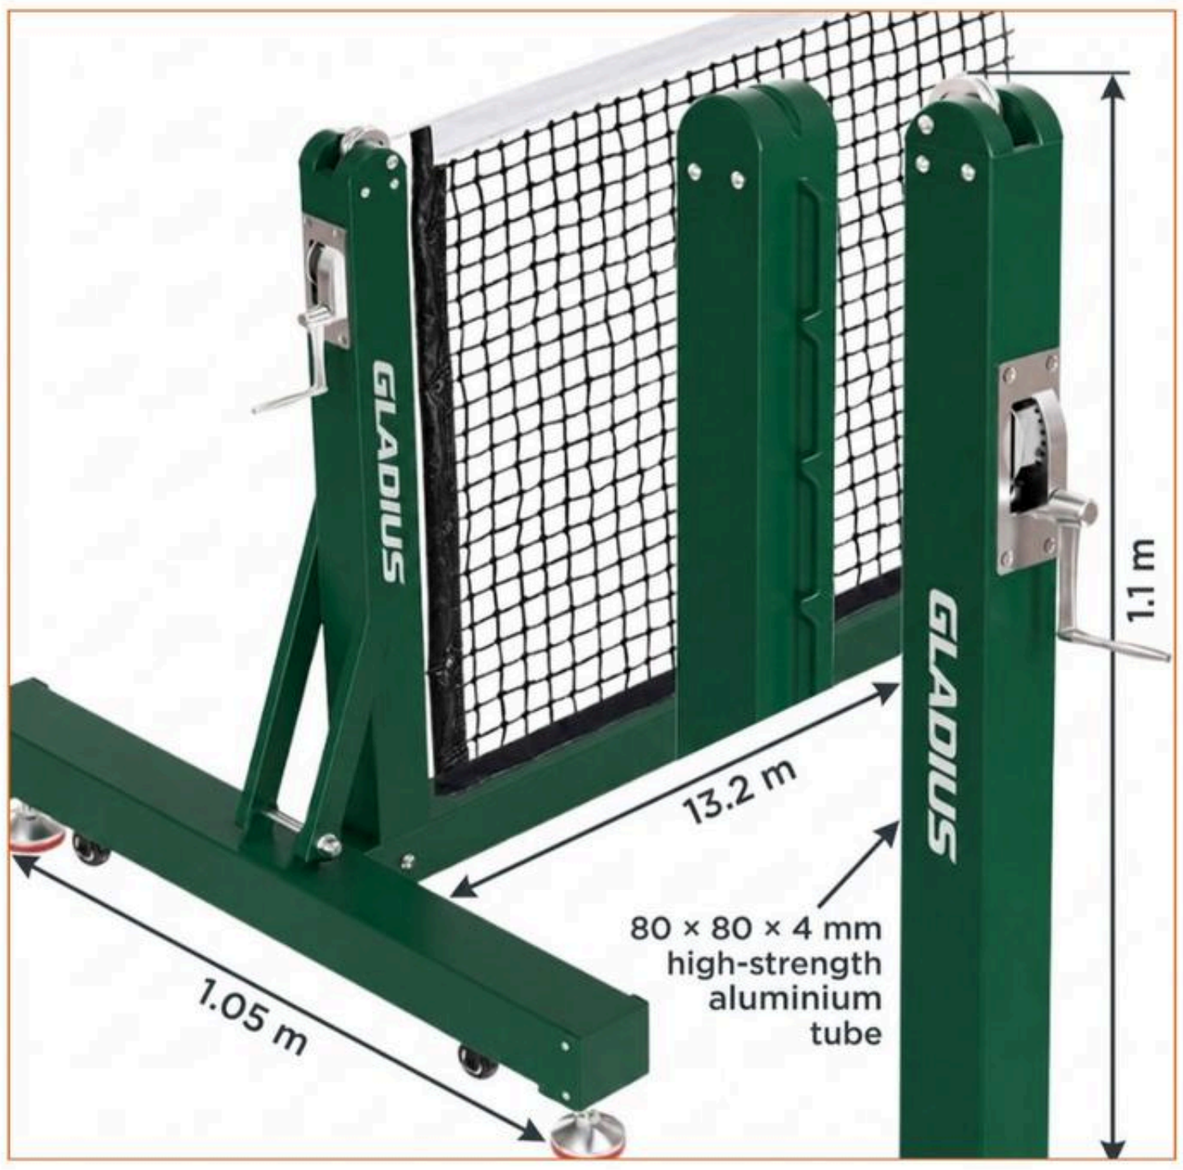

OVERVIEW

Professional portable tennis post system designed for outdoor courts, schools, clubs, and residential facilities. Features a reinforced aluminium structure, precision net tensioning system, mobility wheels, and a high-strength competition net for reliable performance.

TECHNICAL DETAILS

CONSTRUCTION

- 80 × 80 × 4 mm high-strength aluminium tube
- Lightweight yet robust construction
- Suitable for indoor and outdoor tennis courts
- Powder-coated finish for corrosion resistance

NET TENSIONING

- Brass-coated / stainless-steel net tensioner
- Easy-to-operate tensioning mechanism
- Maintains consistent net tension during play

MOBILITY & STABILITY

- High-strength nylon universal wheels with brakes
- Easy to move and position around the court
- Integrated footpads provide stable support during use
- Approx. 200 kg total system weight, including 110 kg counterweight

COMPLETE SYSTEM

- Supplied as a complete package with posts and net
- Includes 4 mm polyethylene mesh net
- Stainless-steel hardware for added durability
- Optional custom branding on posts and net

ON-GROUND TENNIS POST SYSTEM

PROSERVE ON-GROUND

"Grounded in Performance."

80 × 80 mm
Aluminium Post Section

On-Ground
Stainless-Steel Fixings

2 Net Options
Single or Double Layer

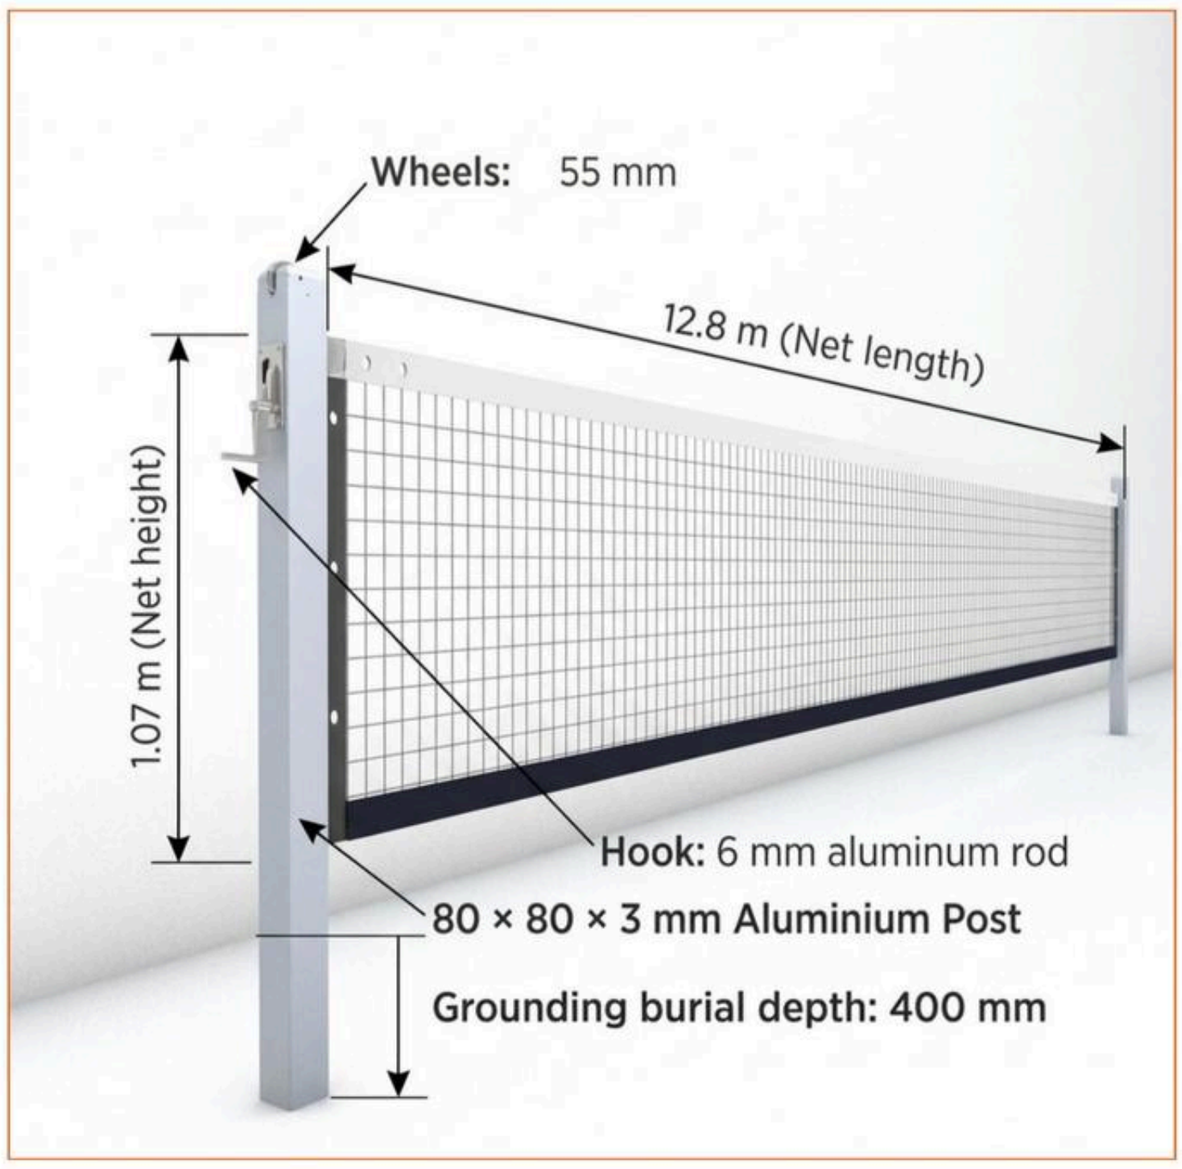

OVERVIEW

An on-ground, all-aluminium tennis post system designed for clubs, academies, schools and recreational courts. Its corrosion-resistant aluminium construction, stainless-steel tensioning system and choice of single-layer or double-layer tennis nets provide reliable performance with a clean, professional appearance.

TECHNICAL DETAILS

CONSTRUCTION

- 80 × 80 mm aluminium posts
- Rust-resistant aluminium construction
- Stainless-steel screws for long-term durability
- Suitable for indoor and outdoor tennis courts

DOUBLE-LAYER TENNIS NET

- Polyethylene woven rope construction
- Double-layer design for added durability
- 1.07 × 12.8 m net size
- 7 fastening points
- PVC-bound top edge with reinforced finish
- Black PVC-bound sides and bottom
- Includes centre band

SINGLE-LAYER TENNIS NET

- Polyethylene woven rope construction
- Single-layer design for a lighter configuration
- 1.07 × 12.8 m net size
- 7 fastening points
- PVC-bound top edge for added durability
- Black PVC-bound sides and bottom
- Includes centre band

HARDWARE & FINISH

- Stainless-steel screws for corrosion resistance
- Durable surface finish for long-term use
- Low-maintenance construction

IN-GROUND TENNIS POST SYSTEM

PROSERVE IN-GROUND

"Set Deep. Play Strong."

1.07 m
Regulation Net Height

In-Ground
400 mm Burial Depth

Aluminium
80 × 80 × 3 mm Posts

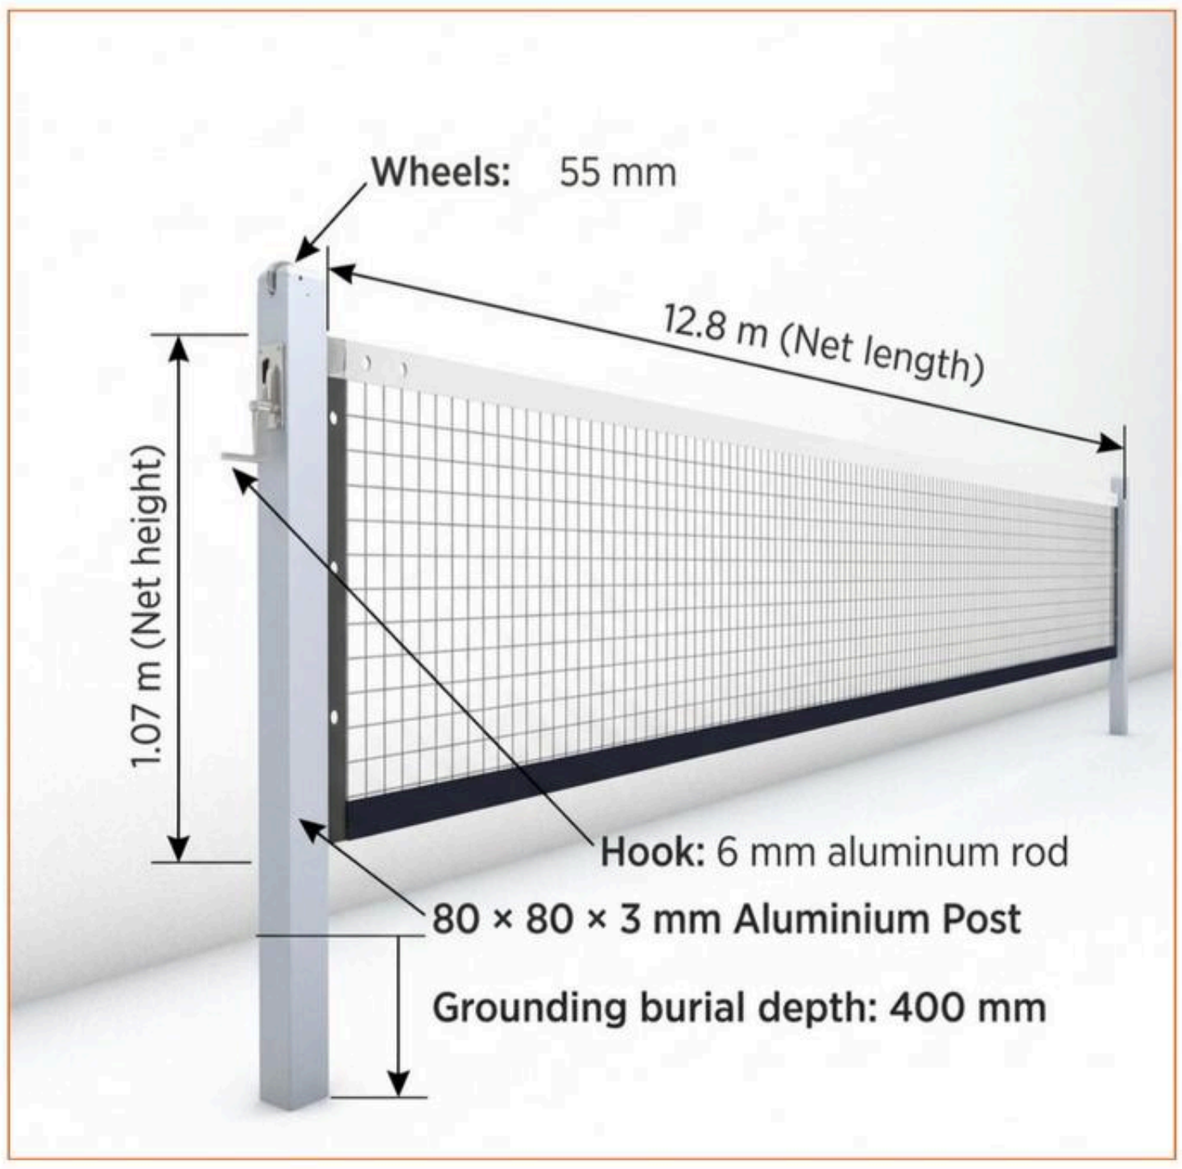

OVERVIEW

A durable in-ground aluminium tennis post system designed for secure installation and reliable net tension. Featuring reinforced aluminium posts, stainless-steel tensioning hardware and corrosion-resistant components, it is ideal for tennis clubs, sports facilities, schools and permanent tennis courts.

TECHNICAL DETAILS

CONSTRUCTION

- 80 × 80 × 3 mm aluminium posts
- Reinforced aluminium strip for added structural strength
- Aluminium alloy post caps for a clean, durable finish
- Corrosion-resistant construction for long-term outdoor use

NET TENSIONING SYSTEM

- Stainless-steel tensioner for smooth net adjustment
- 6 mm aluminium rod hooks for net attachment
- Designed to maintain consistent net tension during play

IN-GROUND INSTALLATION

- 400 mm recommended burial depth
- Fixed installation for enhanced stability
- Ideal for permanent tennis court setups

HARDWARE & COMPONENTS

- 55 mm stainless-steel wheels for smooth tensioner operation
- Durable metal components designed for regular use
- Corrosion-resistant hardware for reduced maintenance

PORTABLE BADMINTON POST

SWIFTSET

"Stable Anywhere. Set Up Everywhere."

42 mm
Steel Post Diameter

Portable
Rear Nylon Wheels

90 kg
Total System Weight

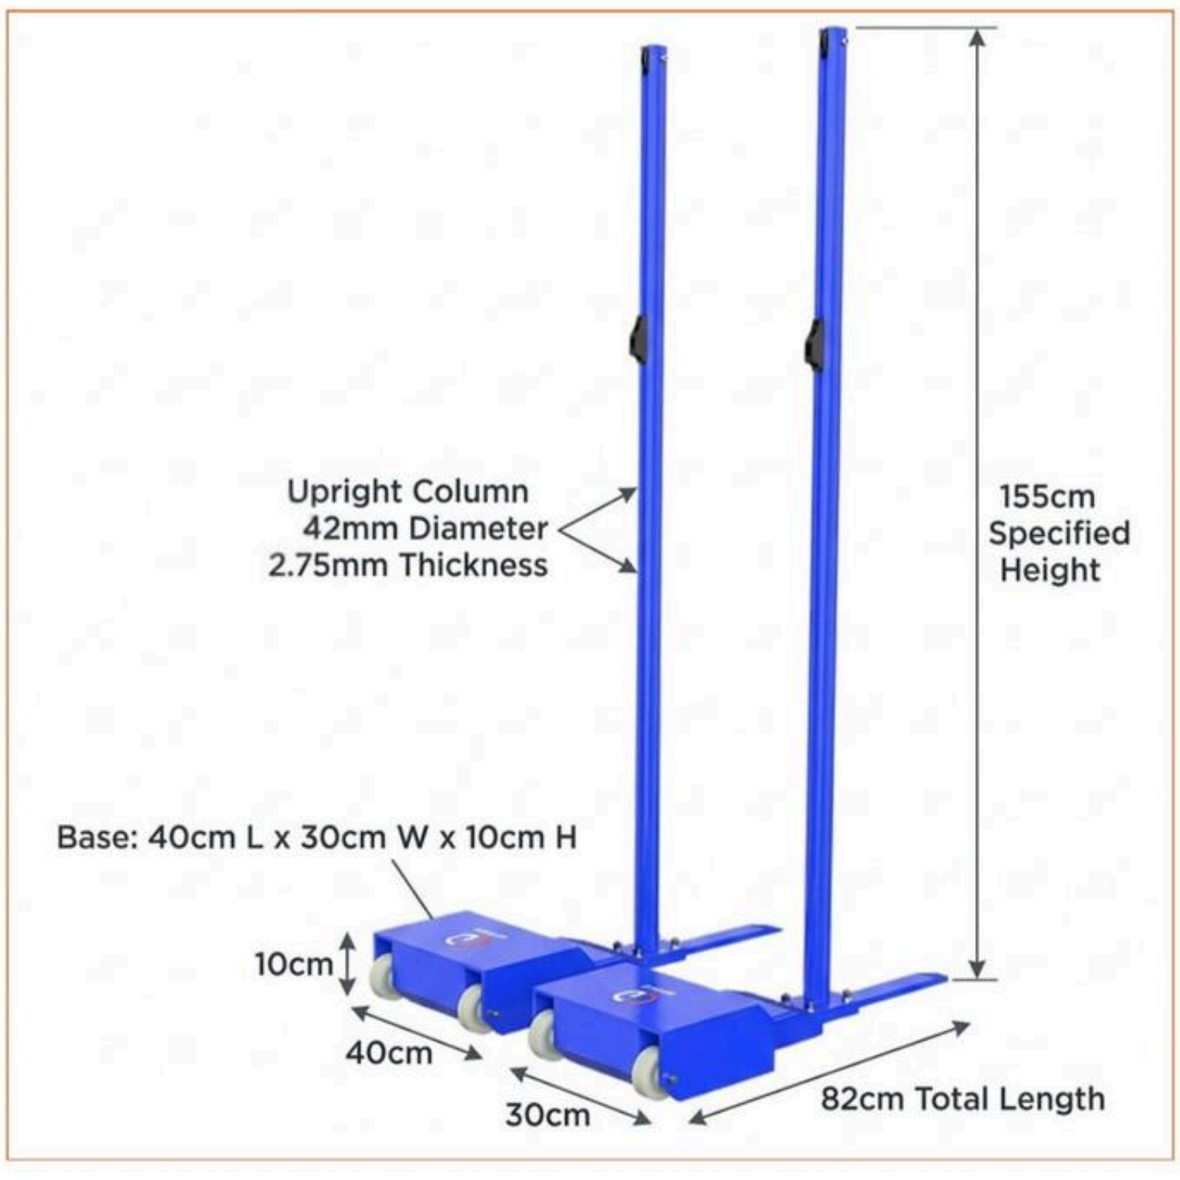

OVERVIEW

Swiftset is a heavy-duty portable badminton post system designed for stable performance and easy movement. Its steel construction, integrated counterweight base, manual adjustment and net tensioning system make it well suited for multi-purpose sports halls, temporary courts and training facilities.

TECHNICAL DETAILS

HEAVY-DUTY STEEL CONSTRUCTION

- 42 mm steel posts for strength and durability
- Robust steel base helps prevent tilting and swaying
- Galvanized and powder-coated finish for added protection
- 90 kg total system weight for enhanced stability

EASY SETUP & ADJUSTMENT

- Manual adjustment with no tools required
- Quick and simple court setup
- Pull-cord tensioner for controlled net tension
- Reinforced tensioning mechanism for long-term reliability

MOBILITY & STORAGE

- Wear-resistant nylon wheels integrated into the rear of the base
- Easy to move between courts and storage areas
- Space-saving design for multi-purpose venues
- Ideal for temporary or frequently reconfigured courts

COMPLETE SYSTEM

- Includes 2 bases, 2 posts, 1 extension and 1 net
- Approx. 45 kg per unit
- Designed as a portable, freestanding badminton system

4 × 2 m
Goal Size

Mobile
10-inch Inflatable Wheels

Aluminium
All-Alloy Frame

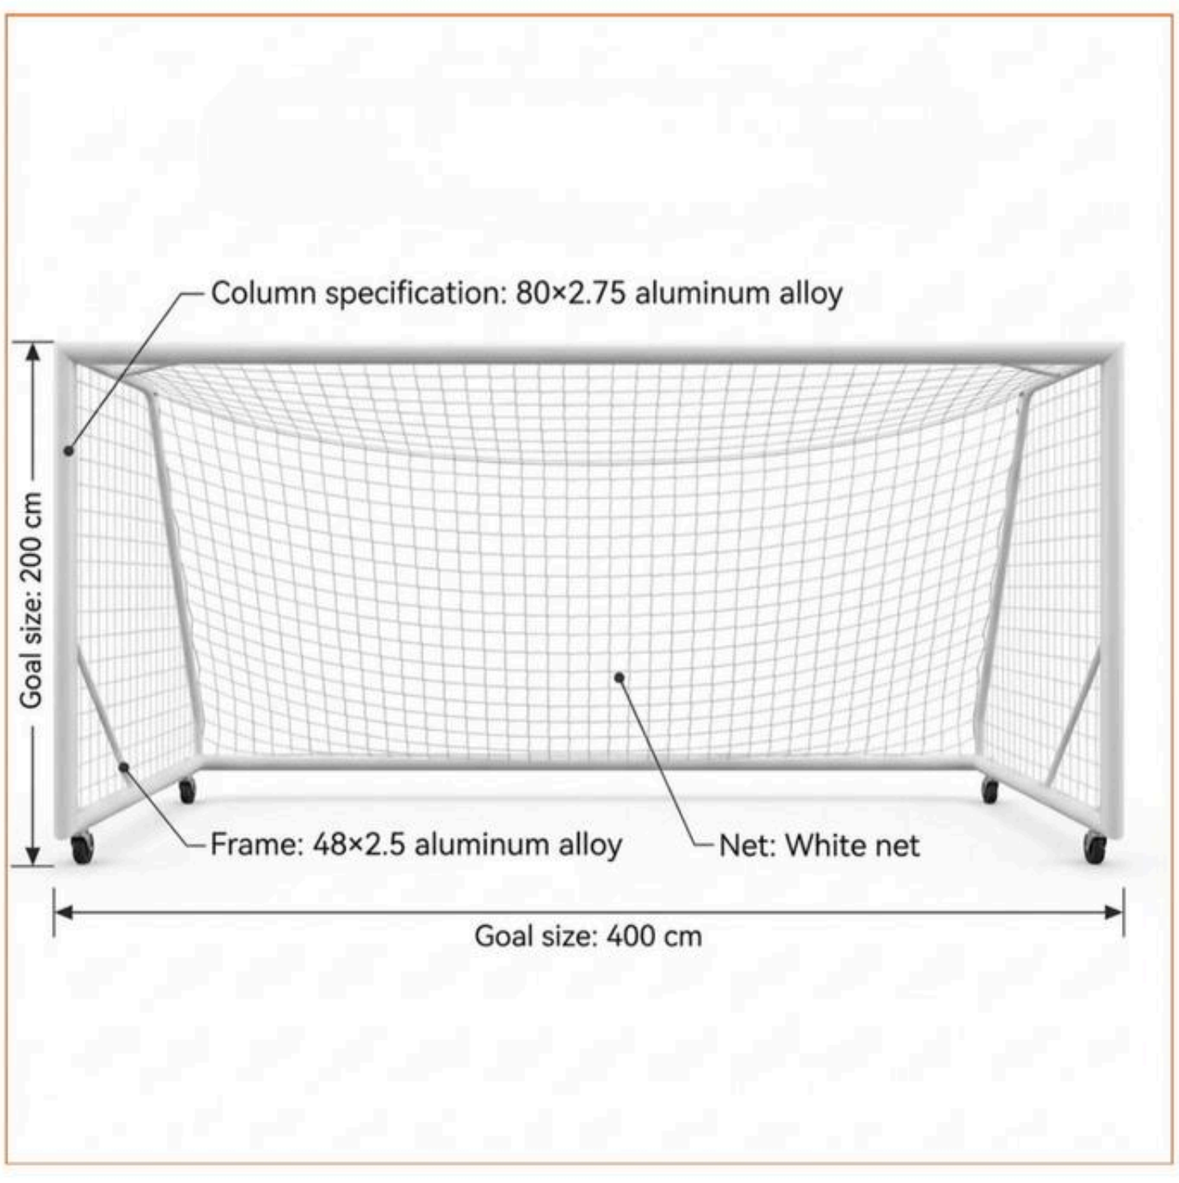

OVERVIEW

A durable 4 × 2 m aluminium football goal designed for training, recreational and small-sided football applications. Its lightweight aluminium construction, reinforced side supports and integrated wheel system provide a practical combination of stability, mobility and long-term outdoor durability.

TECHNICAL DETAILS

FRAME CONSTRUCTION

- All-aluminium alloy construction using industrial-grade material
- 80 × 2.75 mm aluminium goal posts
- 48 × 2.5 mm aluminium crossbar and frame
- Custom-designed elliptical tubing for a distinctive structure
- Stainless-steel screws for corrosion resistance

STABILITY & SUPPORT

- Reinforced side supports improve goal stability
- Electro-galvanized connectors provide added rust protection
- Weather-resistant construction for outdoor use
- Strong frame designed for regular play

NET SYSTEM

- High-quality twisted-rope football net
- Durable construction for repeated use
- White net supplied as standard
- Securely connects to the goal frame

MOBILITY

- 10-inch inflatable wheels for easy movement
- Four-wheel configuration for convenient repositioning
- Ideal for facilities requiring flexible pitch layouts
- Wheels support easier storage and setup
